

Single Terminal Overview

Two different solutions are available for applications that require heavy duty single terminal connections. DEUTSCH DTHD series connectors and Jiffy Splices provide environmentally sealed field-serviceable connections for the full range of wire gauges covered by DEUTSCH contacts. DTHD connectors are heavy duty power terminations for in-line and mounted applications. Jiffy Splices are lightweight in-line splices for quick connections. Both options provide easy installation and service with standard tools and contacts.

DTHD PART NUMBERING SYSTEM

DTHD PART NUMBERS

Position	Contact Size	Plug	Receptacle
1	12	DTHD06-1-12S	DTHD04-1-12P
	8	DTHD06-1-8S	DTHD04-1-8P
	4	DTHD06-1-4S	DTHD04-1-4P

Special Modifications

DTHD series connectors offer modifications to enhance the design flexibility and meet application specific needs. Options include end caps and flanges.

E003 MODIFICATION

The E003 is an end cap modification. The end cap is a protective cap that is sonically welded to the rear of the connector.

L009

L013

L013 & L009 MODIFICATION

The L013 and L009 are sealed flange modifications. The L013 offers outside mounting and the L009 offers inside mounting.

Dalroad

The logo for Dalroad features the word "Dalroad" in a bold, dark blue sans-serif font. A thin, dark blue curved line starts under the 'D', goes under the 'a', and then curves upwards under the 'd'.

UK Authorised TE Connectivity DEUTSCH Connector Distributor

Dalroad supply a wide range of automotive connectors for use on applications from engines to braking systems, providing a firm, secure cable-to-cable connection.
